

# MUHAMMAD MUBEEN YASIN

## FULL STACK DEVELOPER

Faisalabad, Punjab, Pakistan | muhammadmubeenyasir@gmail.com | +923432275634

---

### SUMMARY

---

Results-driven Full Stack Software Engineer with over 4 years of experience in designing and developing robust web applications, with a strong emphasis on backend development using Node.js. Proficient in both front-end and server-side technologies, I specialize in building scalable, high-performance systems that meet complex business requirements. Known for driving projects from initial concept through deployment, I thrive in Agile environments and contribute effectively to cross-functional teams through clear communication, collaborative problem-solving, and a commitment to continuous improvement.

### PROFESSIONAL EXPERIENCE

---

Full Stack Developer	V3Solution   Jan 2021 - Present
<ul style="list-style-type: none"><li>Lead the end-to-end development of web applications, specializing in full-stack web development with Node.js, Next.js, and React.js.</li><li>Architect and develop scalable backend systems, ensuring high performance, security, and efficiency.</li><li>Oversee multiple product development cycles, managing cross-functional teams to deliver innovative software solutions.</li><li>Implement Agile methodologies, streamlining development workflows and enhancing team productivity.</li><li>Drive technical decision-making, mentoring developers and fostering a collaborative environment.</li><li>Demonstrate strong leadership and team management, coordinating between developers, designers, and stakeholders to achieve successful product launches.</li></ul>	
Senior Full Stack Developer   Remote	Crowdbotics (USA)   Feb 2023 - Nov 2024
<ul style="list-style-type: none"><li>Led a team of developers, overseeing project development and ensuring code quality, scalability, and best practices.</li><li>Designed and developed full-stack web applications using Node.js, React.js, and Next.js, delivering high-performance solutions.</li><li>Conducted code reviews, provided technical guidance, and mentored junior developers to enhance team productivity.</li><li>Managed and maintained GitHub Actions for CI/CD pipelines, ensuring smooth and efficient deployment workflows.</li><li>Collaborated with cross-functional teams to define project requirements, troubleshoot issues, and implement new features.</li><li>Pushed production-ready code, ensuring stability, security, and optimal performance in live environments.</li></ul>	

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN stack).
- Built scalable and high-performance APIs, optimizing backend services for efficiency and reliability.
- Developed responsive UI components and ensured seamless frontend-backend integration.
- Collaborated with cross-functional teams to deliver feature-rich applications aligned with business objectives.
- Optimized database queries and improved system performance for better scalability and user experience.
- Managed Git workflows, conducted code reviews, and ensured best practices in software development.

## **CREATIVE WORK**

---

### **Yellow Stone Boys and Girls Ranch (Mental health Web Application)**

- Yellow Stone Boys and Girls Ranch is a revolutionary mobile and web application dedicated to prioritizing youth mental health. This innovative project establishes a secure space for expressing thoughts, provides access to professional counseling, encourages self-care practices, and fosters positive peer connections. It aspires to create a supportive community that breaks the stigma surrounding mental health, empowering young individuals with tools for emotional well-being and resilience.

### **SocioMan – AI-Powered Social Media Management Platform (In Development – 80% Complete)**

- Designed and developed a web and mobile application enabling users to connect and manage multiple social media accounts (Facebook, Instagram, LinkedIn, Twitter) from a single platform.
- Implemented post scheduling, reach analytics, and one-click multi-platform posting, streamlining social media management.
- Integrated AI-powered content assistance, allowing users to generate and refine posts with AI-driven suggestions.
- Developed a scalable backend using Node.js and Mongoose, ensuring seamless data handling and API performance.
- Built the frontend with Next.js and React Native, delivering a highly responsive and user-friendly experience across web and mobile.
- Deployed and optimized the system using Cloudflare, Vercel, and Render, ensuring high availability, security, and performance. [Demo](#)

### **PropWare – Real Estate Lead Management CRM**

- Developed a robust backend system using Node.js, implementing a hierarchical management structure and a KPI-driven workflow to enhance team productivity.
- Built an integrated CRM for real estate professionals, enabling seamless lead tracking and management.

- Connected the platform to Facebook Lead Ads, allowing employees to receive and manage leads directly from Facebook in real-time.
- Developed the web application using React.js and the mobile app using React Native, ensuring a smooth user experience across all devices.
- Designed a scalable architecture, improving system performance, data security, and operational efficiency.
- Demo link of that CRM: [Demo](#)

### The Lodestone Group – Email Marketing & Automation Platform

- Designed and developed a comprehensive email marketing and automation platform to streamline customer engagement and lead nurturing.
- Built the backend using Node.js, ensuring efficient email campaign management, automation workflows, and robust data handling.
- Developed the frontend using React.js, delivering a dynamic, user-friendly interface for seamless campaign creation and performance tracking.
- Implemented customized email templates, automated workflows, and advanced analytics to optimize marketing strategies and enhance user engagement.
- Demo Link Of that Site: [Demo](#)

### Crypto payment gateway through QR Code Binance |API

- Developed a crypto payment gateway using QR Code Binance API in Node.js, integrating request throttling, circuit breaker, and load balancing for enhanced performance and reliability.

## SKILLS

---

- |                         |                  |              |
|-------------------------|------------------|--------------|
| • Front-End development | • React.js       | • GCP        |
| • Back-end development  | • Docker         | • Open AI    |
| • Node.js               | • Github actions | • Firebase   |
| • Next.js               | • Jira           | • PostgresQL |
| • Mongoose              | • Trello         |              |

## EDUCATION

---

**Bachelor's degree, Information Technology**  
National Textile University (Pakistan)

Sep 2017 - Sep 2021

## LICENSES & CERTIFICATIONS

---

- Complete Next.js Developer in 2022: Zero to Mastery - Udemy UC-ecdfddad-42bc-44ee-9d97-85a5a14eOcaa
- Complete Node.js Developer in 2023 (GraphQL, MongoDB, + more) - Udemy UC-77917cc7-41f3-4d55-a2a1-5a1c53592c68
